Key Insights

- People new to Berlin were slightly younger and had a lower income than those who visited Berlin before. Only 1 out of 5 Berlin-Newcomers were from Germany.
- They also slept more often at friends places – however the ones paying for accommodation spent more on that as they stayed longer in Berlin. Hence the overall average accommodation costs level out comparing both groups.
- Due to their longer stay, Berlin newcomers have by 19% a higher economic impact than those already familiar with the city.

* Refers to average spendings per total newcomer visitors including the ones paid for accommodation and the ones who stayed at friend's place.
